In August I sent you a letter and photos describing the destruction of the wetlands by First Energy. They leased property from the Aries Company which owns about 640 acres of marsh along Lake Erie shoreline in Port Clinton, Oh. First Energy filled in acres of wetland to build their own personal shooting range.

A week after I sent that letter First Energy was back at it again. They started pumping out the water and hauling in truckloads of concert and dirt. Enclosed are more photos taken a few weeks ago of First Energy filling in more wetlands.

I don't understand why our government agencies are turning a blind eye when it comes to what First Energy is doing. Why isn't someone protecting the wildlife and the environment? How many more acres of wetland are we going to lose before someone shuts them down?
